Wheel kit fits 84-inch sweeper only – keeps the cutting edge off the ground to lengthen life, but can be compressed if needed to scrape material or sweep in reverse.

Clean hard-to-reach areas – curbs, drainage depressions, alongside buildings – with the optional Bobcat gutter brush attachment. It widens the sweeper's total width by one foot, to let you cover more area per pass. Large, metal bristles produce excellent cleaning action. When not in use, the gutter brush can be raised and stored vertically. The gutter brush may be installed on either side of the 60-inch or 72-inch sweeper. The gutter brush is only installed on the right side of the 84-inch sweeper.

Sweeper

Now you can sweep, collect and dump dirt and other debris with just one attachment. Ideal for construction, industrial or municipal jobs, the hydraulically driven Bobcat sweeper is easy to attach and simple to operate going either forward or reverse. It's perfect for cleaning parking lots, sidewalks, docks, warehouses and more.

The sweeper's floating bristle head follows surface contours independent of the bucket, providing improved surface contact on slopes for better sweeping consistency. The floating head also offers ideal down-pressure for longer bristle life, reducing the number of required bristle adjustments.

Sweeper Features:

- Reversible cutting edge helps cut through caked-on mud.
- Polypropylene bristles deposit dirt and other debris in the bucket, which can be dumped when full.*
- Use the sweeper to spread material evenly across a site.
- Six sizes to fit a variety of Bobcat machines.
