WALK-AROUND

Productivity Features

- ***High Production and Low Fuel Consumption***

Production is increased with larger output during Active mode while fuel efficiency is further improved.

- ***Maximum Digging Height is 10 m 32'10"***, a benefit in jobs requiring a longer reach.

Easy Maintenance

- Replacement interval is extended for engine oil, engine oil filter and hydraulic filter
- Remote mounted engine oil filter and fuel drain valve for easy access
- Water separator is standard equipment
- Easier radiator cleaning
- Fuel tank capacity is increased
- SCSH bushings on work equipment extend lubricating interval from 100 hours to 500 hours (excluding bucket)

- ***Bucket Digging Power Is Increased 29%***

over the PC200LC-6

- ***Higher Lifting Capacity***

PC200LC-7's lateral stability is improved, and lifting capacity is also increased.

Simplified Maintenance

- The replacement interval of the new hydraulic filter is 1,000 hours

Harmony with Environment

- Low emission engine
A powerful turbocharged and air to air aftercooled Komatsu SAA6D102E-2 provides 107 kW **143 HP**. This engine is EPA, EU, and Japan Tier 2 emissions certified without sacrificing power or machine productivity
- Economy mode improves fuel consumption
- Low operating noise

Large Comfortable Cab

PC200LC-7's cab volume is increased by 14%, over the PC200LC-6 offering an exceptionally roomy operating environment.

- Highly pressurized cab with air conditioner
- Low noise design
- Low vibration with cab damper mounting

GALEO

Komatsu's highly productive, innovative technology, environmentally friendly machines built for the 21st century.

PRODUCTIVITY FEATURES

High Production and Low Fuel Consumption

Engine

The PC200LC-7 gets its exceptional power and work capacity from a Komatsu SAA6D102E-2 engine. Output is 107 kW **143 HP**, providing increased hydraulic power and improved fuel efficiency.

Hydraulics

Unique two-pump system ensures smooth compound movement of the work equipment. HydrauMind controls both pumps for efficient engine power use. This system also reduces hydraulic loss during operation.

Large Digging Height

PC200LC-7's maximum digging height is 10 m **32'10"**, facilitating jobs that require a longer reach, such as demolition and slope finishing.

Four Working Modes

Working Mode Selection

The PC200LC-7 excavator is equipped with four working modes (**A**, **E**, **B** and **L** mode). Each mode is designed to match engine speed, pump output, and system pressure with the current application. This provides the flexibility to match equipment performance to the job at hand.

Economy Mode

Economy mode is environmentally friendly. Fuel consumption is reduced 20% (compared with PC200LC-7 Active mode) and production is equal to the PC200LC-6 Heavy-duty mode.

Power Max Function

This function temporarily increases digging force by 7% for added power in tough situations.

Lifting Mode

When the Lifting mode is selected, lifting capacity is increased by 7% by raising hydraulic pressure.

Larger Digging Power Provides Increased Production

Bucket Digging Force		Bucket Digging Speed		Bucket Digging Power
10% increased	x	17% increased	=	29% increased
1.10	x	1.17	=	1.29

Bucket Digging Power is obtained by bucket digging force x bucket digging speed. New PC200LC-7 bucket digging force is increased by 10% and bucket digging speed is increased by 17%, the resulting total bucket digging power is increased 29% (bucket digging force compared with PC200LC-6). The digging force and speed generated result in the largest digging power and the largest production in the 20 ton **22 U.S. ton** class.

Bucket Digging Force*: SAE 138 kN 14100 kg **31,080 lb**
 ISO 149 kN 15200 kg **33,510 lb**
 Arm Crowd Force*: SAE 101 kN 10300 kg **22,710 lb**
 ISO 108 kN 11000 kg **24,250 lb**

Automatic Three-Travel Speed

Travel speed is automatically shifted from high to low speed according to the pressure required to travel.

	High	Mid	Low
Travel Speed	5.5 km/h 3.4 mph	4.1 km/h 2.5 mph	3.0 km/h 1.9 mph

Multi-Function Color Monitor

A newly developed Multi-Function Color Monitor has multiple functions, such as Working mode selection, hydraulic pump oil flow adjustment for matching to attachment, and maintenance interval notice, etc.

Working Mode Selection

The Multi-Function Color Monitor allows for easy selection of the working modes (A, E, B and L modes).

Automatic Three-Travel Speed

Travel speed is automatically shifted from high to low speed according to the pressure required to travel.

EMMS (Equipment Management Monitoring System)

Monitor Function

Controller monitors engine oil level, coolant temperature, battery charge and air clogging, etc. If the controller finds any abnormality, it is displayed.

Maintenance Function

The monitor informs replacement time of oil, filters and other maintenance items when the designated interval is reached.

Trouble Data Memory Function

The monitor stores machine abnormalities for effective troubleshooting.

Excellent Reliability and Durability

• High Rigidity Work Equipment

The arm and boom are strengthened to correspond to increased bucket and arm digging forces. The arm and boom cross sectional strength are increased 31% and 4% respectively. The boom and arm have large cross-sectional dimensions as well as continuous groove welding, improving digging and side-contact strength.

• Sturdy Frame Structure

The revolving frame, center frame and undercarriage are designed by using the most advanced three-dimensional CAD and FEM analysis technology.

• Reliable Components

All of the major machine components, such as engine, hydraulic pumps, hydraulic motors and control valves, etc., are exclusively designed and manufactured by Komatsu.

• Highly Reliable Electronic Devices

Exclusively designed electronic devices have passed severe testing.

- Sensors
- Connectors
- Heat resistant wiring

Grease Sealed Track provides excellent undercarriage durability

Track Link with Strut

PC200LC-7 uses track links with strut providing superb durability

WORKING ENVIRONMENT

PC200LC-7 cab interior is spacious and provides a comfortable working environment...

Large Comfortable Cab

Comfortable Cab

New PC200LC-7's cab volume is increased by 14%, offering an exceptionally comfortable operating environment. The large cab permits full flat reclining of the seat back.

Pressurized Cab

The air conditioner, air filter and a higher internal air pressure (6.0 mm Aq **0.2" Aq**) prevent external dust from entering the cab.

Low Noise Design

Noise level is remarkably reduced, not only engine noise but also noise when swinging and hydraulic relief.

Low Vibration with Cab Damper Mounting

PC200LC-7 uses new, improved multi-layer viscous mount system that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with strengthened left and right side decks aids vibration reduction at the operator's seat.

Vibration at floor is reduced from 120 dB (VL) to 115 dB (VL).

dB (VL) is index for expressing size of vibration.

Washable Cab Floormat

The PC200LC-7's cab floormat is easy to keep clean. The gently inclined surface has a flanged floormat and drainage holes to facilitate runoff.

SAFETY FEATURES

Safety Features

Wide Visibility

The right side window pillar has been removed and the rear pillar reshaped to provide better visibility. Blind spots have been decreased by 34%.

Pump/engine room partition

prevents oil from spraying on the engine if a hydraulic hose should burst.

Thermal and fan guards are placed around high-temperature parts of the engine and fan drive.

Steps with non-skid sheet and large handrail. Steps with non-skid sheet provide anti-slip footing for maintenance.

Multi-Position Controls

The multi-position, pressure proportional control levers allow the operator to work in comfort while maintaining precise control. A double-slide mechanism allows the seat and controllers to move together or independently, allowing the operator to position the controllers for maximum productivity and comfort.

MAINTENANCE FEATURES

Easy Maintenance

Komatsu designed the PC200LC-7 to have easy service access. We know by doing this, routine maintenance and servicing are less likely to be skipped, which can mean a reduction in costly downtime later on. Here are some of the many service features found on the PC200LC-7.

Easy Radiator Cleaning

- **Easy Radiator Cleaning**
Clearance between radiator and oil cooler is increased to facilitate radiator core cleaning with an air nozzle.

- **Water Separator** is standard equipment, removing water mixed in fuel and preventing fuel system damage.

Water Separator

Remote Mounted Engine Oil Filter

- **Easy Access to Engine Oil Filter and Fuel Drain Valve.** Engine oil filter and fuel drain valve are remotely mounted to improve accessibility.

- **High-pressure in-line filters** protects the hydraulic system from debris in the event of pump failure.

Reducing Maintenance Costs

- **Hydraulic Oil and Filter/Engine Oil and Filter Replacement Interval Extended**

The new high performance filters are used in the hydraulic circuit and engine. Hydraulic oil filter, engine oil, and engine oil filter element replacement intervals are significantly extended to reduce maintenance costs.

Comparison of Replacement Intervals unit: hours

	PC200LC-7	PC200LC-6
Engine oil	500	250
Engine oil filter	500	250
Hydraulic oil	5,000	5,000
Hydraulic oil filter	1,000	500

Outer Air Filter

Inner Air Filter

Removal and installation of air conditioner filter element, without tools, facilitates cleaning.

- **Easy Cab Filter Maintenance**

Tool free removal of the internal and external cab filters.

- **Fuel Tank Capacity Increased**

Fuel tank capacity is increased from 340 ltr **89.8 U.S. gal** to 400 ltr **105.7 U.S. gal** to extend operating hours before refueling. The fuel tank is treated for rust prevention and improved corrosion resistance.
