

StringerShield™ Guardrail System

StringerShield Guardrail System Provides Simple Guardrail Protection for Stringer or Pan Stairs

Safety Maker's new **StringerShield™** is designed to allow contractors to stay in compliance with United States Federal OSHA guardrail regulations when guarding unprotected stringer stairs or pan stairs. The guardrail system easily clips onto the unprotected edge of the stringer channel with no drilling.

Every Order Ships With
Easy-To-Read Installation
Instructions in English & Spanish
with Engineering Report

StringerShield Easily
Adjusts for Stringers
Sized 8 to 12 inches

The **StringerShield Guardrail Clamp** provides an easy-to-install, reliable guardrail system designed to protect unprotected stringer stairs or pan stairs. The StringerShield's unique design is easily adjustable and fits various sizes of stringers. All orders ship with a Stress Engineering Report Summary verifying OSHA guardrail compliance.

Construction grade (stress grade) lumber can be utilized to construct the top rail and mid rail. 2X4 holders allow for simple installation and the system easily removes for use on the next level or project.

The StringerShield's Durable Steel Construction is Powder Coated for a Tough Long-Lasting Finish.
